The ads claim that you will qualify to receive a "free grant" for your education, your home repairs, your home business, or your unpaid bills. They say your application is guaranteed to be accepted, and you never have to repay the money. But the Federal Trade Commission (FTC) warns that "money for nothing" grant offers often are a scam: the grant isn't free, it isn't guaranteed, and often, it isn't even available to you.
- [Medicare Beneficiaries Urged to Be on the Look-out for Phone Scams](#)

Seniors and people with disabilities should be aware of a scheme that asks Medicare beneficiaries for money and checking account information to help them enroll in a Medicare Prescription Drug Plan. NO Medicare drug plan can ask a person with Medicare for bank account or other personal information over the telephone.
- [Social Security E-mail Scam](#)

The Social Security Administration has received several reports of an email message being circulated with the subject "Cost-of-Living for 2007 update" and purporting to be from the Social Security Administration. Once directed to the phony website, the individual is asked to register for a password and to confirm their identity by providing personal information such as the individual's Social Security number, bank account information and credit card information.

### ***What is Sequestration?***

Sequestration, sometimes called the sequester, is a process that automatically cuts the federal budget across most departments and agencies.

Congress included the threat of sequestration in the [Budget Control Act of 2011](#) as a way to encourage compromise on deficit reduction efforts.

Congress couldn't agree on a budget by the deadline set in the Budget Control Act, so mandatory budget cuts were scheduled to go into effect on January 2, 2013.

Congress stopped the cuts from happening by passing the [American Taxpayer Relief Act](#) on January 2. This law pushed the budget cuts back until March 1, 2013.

Since Congress did not agree on a budget to reduce the deficit by March 1, sequestration has begun and \$85 billion in spending cuts are currently going into effect.

These reports give detailed information about the amount that programs may be cut and which programs are exempt from sequestration:

## **USDA posts rural funding guide for local governments**

The U.S. Department of Agriculture (USDA) recently posted a useful guide outlining federal funding programs available to support rural communities.

[Federal Resources for Sustainable Rural Communities](#) (PDF 44p 6MB) is a guide to programs from the Partnership for Sustainable Communities and the U.S. Department of Agriculture (USDA) that rural communities can use to promote economic competitiveness, protect healthy environments, and enhance quality of life. It is a collaborative effort among USDA, the Department of Housing and Urban Development, the Department of Transportation and the Environmental Protection Agency.

The guide has key information on funding and technical assistance opportunities available from the four agencies, as well as examples of how rural communities across the country have benefitted from federal resources. [The resource guide can be accessed here.](#)

Climate variability and change present society with significant economic, health, safety, and national security challenges. NOAA advances scientific and technical programs to help society cope with, and adapt to, today's variations in climate and to prepare for tomorrow's. Toward this end, the agency conducts and supports climate research, essential oceanic and atmospheric observations, modeling, information management, assessments, interdisciplinary decision support research, outreach, education, and stakeholder partnership development. These investments are key to NOAA's mission of "Science, Service, and Stewardship" and are guided by the agency's vision to create and sustain enhanced resilience in ecosystems, communities, and economies, as described in NOAA's Next Generation Strategic Plan (NGSP). Fostering climate adaptation and mitigation, and, specifically, the development of an informed society anticipating and responding to climate and its impacts – is one of the primary pathways through which NOAA plans to advance its mission. The NGSP outlines NOAA's long-term climate goal, with the following objectives: 1) Improved scientific understanding of the changing climate system and its impacts; 2) Assessments of current and future states of the climate system that identify potential impacts and inform science, service, and stewardship decisions; 3) Mitigation and adaptation choices supported by sustained, reliable,

and timely climate services; and 4) A climate-literate public that understands its vulnerabilities to a changing climate and makes informed decisions. NOAA works in partnership with all levels of governing structures (e.g., federal, state, tribal, regional, local), academic, private, and international research entities, and it places a substantial emphasis on productive partnerships and interactions with decision makers and other stakeholders. Within this context, NOAA's Climate Program Office (CPO) manages competitive research programs through which NOAA funds high-priority climate science, assessments, decision support research, outreach, education, and capacity-building activities designed to advance our understanding of Earth's climate system and to foster the application of this knowledge in risk management and adaptation efforts. The CPO supports research that is conducted across the United States and internationally. The CPO also provides strategic guidance for the agency's climate science and services programs and supports NOAA's contributions to the U.S. Global Change Research Program (USGCRP) and its National Climate Assessment and similar international endeavors. In seeking to advance the NGSP climate objective of an improved scientific understanding of the changing climate system and its impacts, the CPO supports research that advances core capabilities in (a) understanding and modeling, (b) observing systems, data stewardship, and climate monitoring, (c) predictions and projections, and (d) integrated service development and decision support. These core capabilities are, in turn, intended to advance NOAA's ability to provide sustained, reliable, and timely climate services dealing initially, according to the NGSP, with the following broad, societal challenge areas: (a) climate impacts on water resources, (b) vulnerability of coasts and their resilience to climate impacts, (c) sustainability of marine ecosystems, (d) changes in extremes of weather and climate, and (e) information for mitigating climate change. The CPO, therefore, supports research that addresses these societal challenges. \_\_\_\_\_

Collaborative Science, Technology, and Applied Research (CSTAR) Program Grant

<b>Document Type:</b>	Grants Notice
<b>Funding Opportunity Number:</b>	NOAA-NWS-NWSP0-2014-2003851
<b>Funding Opportunity Title:</b>	Collaborative Science, Technology, and Applied Research (CSTAR) Program
<b>Opportunity Category:</b>	Discretionary
<b>Funding Instrument Type:</b>	Cooperative Agreement
<b>Category of Funding Activity:</b>	Education Environment Science and Technology and other Research and Development
<b>Category Explanation:</b>	
<b>Expected Number of Awards:</b>	5
<b>CFDA Number(s):</b>	11.468 -- Applied Meteorological Research
<b>Cost Sharing or Matching Requirement:</b>	No
<b>Posted Date:</b>	Aug 20, 2013
<b>Creation Date:</b>	Aug 20, 2013
<b>Original Closing Date for Applications:</b>	Oct 31, 2013
<b>Current Closing Date for Applications:</b>	Oct 31, 2013
<b>Archive Date:</b>	Nov 30, 2013
<b>Estimated Total Program Funding:</b>	\$500,000
<b>Award Ceiling:</b>	\$125,000
<b>Eligible Applicants:</b>	Private institutions of higher education Public and State controlled institutions of higher education
<b>Agency Name:</b>	Department of Commerce
<b>Description:</b>	The long term objective of the CSTAR Program is to improve the overall forecast and warning capabilities of the operational hydrometeorological community by addressing the following science and technology themes through collaborative research efforts between the NWS and academic institutions: Warn on Forecast for High Impact Events: Decision support services will be enhanced by developing the capability to issue short-fused warnings/alerts before the phenomena actually occur. This concept, called "Warn on

Forecast," advances the idea of warnings/alerts issued with greater lead times, allowing decision makers the opportunity to make better, more informed choices across the spectrum of high impact events. Warn on Forecast requires improved data assimilation and numerical models that capture the convective scale to provide improved "initiation of convection" forecasts. Next Generation Forecast System: Decision support services will be enhanced by developing a next generation forecast system that will provide an increasing number of environmental and uncertainty fields in a high spatial and temporal resolution four-dimensional gridded database. The forecast database will support core operational services and be used as input to external user decision support systems. The forecast database would represent the best, quality-controlled state of current and forecast environmental conditions. Integrated Observing and Analysis System: Decision support services will be enhanced by developing a robust next generation "Integrated Observing and Analysis System" to produce the best "state of the environment" and serve as the basis for future forecast systems such as "Warn on Forecast" and the "Next Generation 4-D Forecast System." Decision Support Information Systems: Operational weather and water services will evolve from a role of disseminating data and products to one of interactive sharing of weather and climate environmental information for the primary goal of providing decision support to community leaders, partners and the public. Integrating Social Science into Weather and Water Research and Operations: Operational decision support services will be enhanced by improving the ability to assess, understand, and meet customer needs and determine the value those services provide through the integration of social science in its research and operational programs. Individual NWS Regions and the National Centers for Environmental Prediction (NCEP) service centers have developed a set of science priorities that can be categorized under these science and technology themes and reflect factors such as topography, weather regimes, and mission.

<b>Archive Date:</b>	Mar 23, 2014
<b>Estimated Total Program Funding:</b>	
<b>Award Ceiling:</b>	\$1,000,000
<b>Award Floor:</b>	\$250,000
<b>Eligible Applicants:</b>	Others (see text field entitled "Additional Information on Eligibility" for clarification)
<b>Additional Information on Eligibility:</b>	Eligible funding applicants for this competition are institutions of higher education, non-profit and for-profit organizations, and State, local and tribal governments. Federal agencies or institutions and foreign governments may not be the primary recipient of awards under this announcement, but they are encouraged to partner with applicants when appropriate. If requesting funds under this award, Federal partners must identify the relevant statutory

authorities that will allow for the receipt of funds. Because of the nature of this competition, the Economy Act (31 U.S.C. 1535) is not an appropriate authority.

**Agency Name:**

Department of Commerce

**Description:**

The U.S. Integrated Ocean Observing System (IOOS®) is a national and regional partnership working to provide observations, data and new tools and forecasts to improve safety, enhance the economy, and protect our environment. To deliver these tools and forecasts, more ocean, coastal and Great Lakes observations are needed. To increase observational capabilities we need smart investments in innovative marine sensors and other advanced observing technologies that will improve our ability to monitor these waters with greater efficiency. The NOAA Ocean Acidification Program (OAP), in close partnership with U.S. IOOS, oversees and coordinates ocean acidification monitoring which contributes to the conservation of marine ecosystems. The U.S. IOOS Program and the NOAA Ocean Acidification Program (Programs) are seeking to jointly fund projects, subject to the availability of funds, which advance new or existing marine sensors and other observing technologies that address long standing and emerging coastal observing challenges. The projects will be focused on those sensors and other observing technologies for which there are demonstrated operational end-users who commit to integrated, long term use of those technologies and open data sharing. Funding will be targeted to marine sensors and other observing technologies that are beyond their research phase, with specific emphasis on transition and life cycle costs, including data management, overall operations, and maintenance expenses. The Programs are seeking Letters of Intent (LOIs) from prospective investigators relating how their project ideas align with either of two topic areas: 1) a very broad topic of marine sensor transitions, and 2) a narrower topic of ocean acidification observing technologies to better serve the ocean observing needs for impacted or potentially vulnerable industries or stakeholders (e.g., fisheries, coral reef conservation, state agencies, others). Applicants are invited to submit LOIs for either of these topic areas, which are described in detail below. Applicants should ensure that the topic

area to which they apply is clearly identified and that all required information is presented such that merit reviewers can best evaluate the proposal. In FY 2014, it is estimated that up to \$8 million will be available from the U.S. IOOS Program along with up to \$1 million from the NOAA Ocean Acidification Program. Multiple awards are anticipated, subject to availability of funds, in amounts ranging from approximately \$250,000 to \$1 million per year for up to three years, with some exceptions for highly ranked proposals, subject to the availability of funds. Investigators are highly encouraged to visit the U.S. IOOS and NOAA Ocean Acidification Program websites for more information about the Programs: [www.ioos.noaa.gov](http://www.ioos.noaa.gov) and [oceanacidification.noaa.gov](http://oceanacidification.noaa.gov).

<b>Agency Name:</b>	Department of Commerce
<b>Description:</b>	<p>A principal objective of the NOAA Marine Debris Program is to provide federal financial and technical assistance to grass-roots, community-based activities that improve living marine resource habitats through the removal of marine debris and promote stewardship and a conservation ethic for NOAA trust resources. NOAA trust resources include living marine resources and their habitats, including commercial and recreational fishery resources (marine fish and shellfish); coastal habitats; diadromous fish species; endangered and threatened marine species; marine mammals and marine turtles; marshes, mangroves, seagrass beds, coral reefs, other coastal habitats; areas identified by NOAA Fisheries as essential fish habitat (EFH); and areas within EFH identified as Habitat Areas of Particular Concern (HAPC). NOAA trust resources can also include marine habitats and resources associated with National Marine Sanctuaries, National Estuarine Research Reserves, and areas under state coastal management programs, including Areas of Concern within the Great Lakes. The program aims to foster collaboration among diverse entities and groups (e.g., public and nonprofit organizations, citizen and watershed groups, anglers, boaters, industry, corporations and businesses, youth conservation corps, students, landowners, academics, and local, state, and federal government agencies) in order to cooperatively implement safe, impactful, and cost-</p>

effective marine debris removal projects. In order to track project success, funded projects will need to be able to report the total amount of debris removed (metric tons), total area or extent cleaned or restored (acres and/or miles), types of debris encountered, and volunteer hours involved.

**Corporation for National and Community Service**

**General Program Overview**

AmeriCorps provides resources, both human and financial, to organizations that engage Americans in intensive service to meet our country's critical needs.

Grantees use the funding to support AmeriCorps members for intensive service in their community. AmeriCorps grants partially cover the expense of operating an AmeriCorps program and do not cover general organizational expenses. A cash and in-kind match is required.

**Procurement Technical Assistance Centers (PTACs) (PDF)**

Procurement Technical Assistance Centers (PTACs) are charged with assisting businesses in learning how to do business with federal, state, and local governments. PTACs are a local resource available at no or nominal cost that can provide assistance to business firms in marketing their products and services. They offer training to businesses on how to research and bid on contracts.

For detailed information regarding technical goals, potential proposers are advised to refer to the websites cited above. They also are encouraged to contact DoD program managers listed at those sites before submitting proposals, in order to explore research areas that are of mutual interest to the proposers and DoD administering agencies. A proposal may be submitted to more than one administering agency; however, only one administering agency will fund the proposal, if selected, under the 2014 DURIP. A central purpose of the DURIP is to provide equipment to enhance research-related education. Therefore, proposals must address the impact of the equipment on the institution's ability to educate students, through research, in disciplines important to DoD missions.

**FORECAST OF FUNDING OPPORTUNITIES UNDER THE DEPARTMENT OF  
EDUCATION DISCRETIONARY GRANT PROGRAMS FOR FISCAL YEAR  
(FY) 2013**

**(As of June 28, 2013)**

The Department of Education lists virtually all programs and competitions under which the Department has invited or expects to invite applications for new awards and provides actual or estimated deadline dates for the transmittal of applications under these programs. The lists are in the form of charts -- organized according to the Department's principal program offices -- and include programs and competitions the Department has previously announced, as well as those it plans to announce at a later date.

**Note:** This document is advisory only and is not an official application notice of the Department of Education which expects to provide updates to this document starting in the first week of November in a fiscal year and continuing through the following July.

## Apply for a Grant

ED offers three kinds of grants:

- **Discretionary grants:** awarded using a competitive process.
- **Student loans or grants:** to help students attend college.
- **Formula grants:** uses formulas determined by Congress and has no application process.

### GRANTS & CONTRACTS

Much of the work of the Department of Energy's Office of Science (SC) is supported through grants and contractual vehicles. This work is processed through the Office of Science Grants and Contracts Division (GCD) which serves as the principal acquisition, financial assistance (grants and cooperative agreements) and contract/grant management advisor to the Director of Science. The GCD provides independent analyses, advice and recommendations on procurement and assistance actions initiated by SC, identifies problem areas, opportunities and management issues and makes recommendations; serves as SC focal point in developing positions and responses to proposed Federal and DOE procurement and assistance regulations and business management policies and procedures; provides advice and guidance and serves as the SC focal point with DOE field offices, laboratories, universities, contractors, grantees and other Government agencies on SC policies and strategies with respect to acquisition, financial assistance and contract/grant management issues.

The Department's Office of Nuclear Energy re-established, in FY 1988, a competitive peer-reviewed program to provide grants allowing nuclear engineering faculty and students to conduct innovative research in nuclear engineering and related areas. The awards run from one to three years and are granted in eight separate technical areas related to nuclear engineering: reactor physics, reactor engineering, reactor materials, radiological engineering, radioactive waste management, applied radiation science, nuclear safety and risk analysis, and innovative technologies for next generation reactors, space power and propulsion, or radiation sources. This type of research is vital to the academic community to help promote excellence in nuclear engineering and provide resolution to issues confronting nuclear engineering in general.

The Office of Nuclear Energy provides tuition, stipends, and practicum to outstanding graduate students studying nuclear engineering and health physics and undergraduate scholarships and practicum to students pursuing a nuclear engineering course of study to ensure that our country will have an adequate supply of trained nuclear scientists and engineers. As an element of this activity, the University Partnership Program pairs minority institutions with institutions offering a nuclear engineering degree to enable more minorities to enter the field of nuclear engineering.

<b>Additional Information on Eligibility:</b>	<p>SBIR/STTR program eligibility requirements are in place to ensure that the funds go only to small, independent US businesses. The regulations include restrictions about (1) the type of firm, (2) its ownership structure, and (3) the firm's size in terms of the number of employees. The purpose of the requirement regarding type of firm is to target the awards to firms with an economic interest in developing the idea or research into a commercial application. The purpose of the ownership requirement is to limit the program to independent firms controlled by US citizens or permanent resident aliens as a way of maximizing the likelihood that the funding will stimulate innovative activity within the US economy. The purpose of the size restriction (number of employees of the firm and its affiliates) is to limit program funding to small business concerns which have a unique capacity for innovation and are more likely to be constrained by lack of access to such funding. ### HHS Grants Forecast

The Department of Health and Human Services' Grants Forecast is a database of **planned** grant opportunities proposed by its [agencies](#). Each Forecast record contains actual or estimated dates and funding levels for grants that the agency intends to award during the fiscal year. Forecast **opportunities are subject to change** based on enactment of congressional appropriations.

When funding is available and an agency is ready to accept applications, the agency will issue an official notice, known as a Funding Opportunity Announcement (FOA), which will be available on Grants.gov. The FOA provides guidance on how to receive an application kit and instructions on how to apply.

The main content area is titled "DHS Financial Assistance" and includes a "Financial Assistance Overview" section. The overview text states: "Most DHS Components have authority to execute and manage financial assistance to support the DHS mission. Financial assistance is the transfer to a non-Federal recipient of anything of value for a public purpose, and in DHS includes grants, cooperative agreements, training, loans, direct payments, and National flood insurance."

Below the overview is a "Background" section which states: "Although most DHS Components possess some grant-making programs, the majority of programs and funding exists within the Federal Emergency Management Agency (FEMA). DHS supports a wide variety of financial assistance including post-disaster relief and resilience, preparedness, boating safety, cybersecurity, research, university centers of excellence, and assistance to fire fighters. The chart below reflects the distribution of financial assistance activity and funding by DHS mission."

The page also features a "Financial Assistance Policy and Oversight (FAPO)" section, which states: "FAPO is within the DHS Office of the Chief Financial Officer, Undersecretary of Management. The office is the functional lead for the Financial Assistance Line of Business. FAPO is responsible for providing oversight, to include the issuance of policy, for all DHS financial assistance programs. The team works with DHS Components to ensure a 'One DHS' approach for financial assistance. The Office consists of four units: Information Management and Reporting, Financial Assistance Policy, Financial Assistance Oversight and Strategic

On the right side of the page, there is a "Financial Assistance Resources" section with a list of links to various DHS components and agencies, including: DHS Components/Directorates issuing financial assistance, Federal Emergency Management Agency (FEMA), United States Coast Guard (USCG), Science and Technology (S&T), Defense Nuclear Detection Office (DNDO), U.S. Citizenship and Immigration Services (USCIS), National Protection and Programs Directorate (NPPD), Office of Health Affairs (OHA), Immigration and Customs Enforcement (ICE), and United States Secret Service (USSS).

FEMA

Dear FEMA Grantee:

In August 2011, Congress passed the Budget Control Act of 2011 (Public Law 112-25) to limit federal spending and reduce our national debt. To enforce annual spending limits, that law requires across-the-board funding reductions to almost every federal program, project, and activity through a process called "sequestration."

As a consequence, all federal agencies, including FEMA, will have to implement steep funding cuts, beginning in the current fiscal year. Leadership throughout FEMA and the Department of Homeland Security have been working hard to determine how we might best mitigate the impact of possible sequestration budget reductions on our state, local, tribal, territorial, non-profit and private sector partners.

Nonetheless, the sequestration order issued on March 1, 2013 will result in FEMA's current Fiscal Year (FY) 2013 funding levels being reduced by approximately 5%. This will result in a reduction to FEMA's State and Local grant funding levels of approximately \$104 million.

The sequestration reductions will affect FY 2013 funding levels for all GPD grants, subject to FEMA's final FY 2013 appropriation. Sequestration will not affect grants or cooperative agreements awarded in previous fiscal years.

We recognize the hardships that sequestration is likely to cause and thank you for your cooperation as we work together to manage these unfortunate circumstances. We value the important work that you do and appreciate your dedication to the security and resilience of the Nation. As always, your thoughts, questions and concerns are welcome.

Sincerely,

David J. Kaufman  
Acting Assistant Administrator  
Grant Programs Directorate

## Federal Funding Alternative To AFG

**State Administrative Agencies (SAA)** apply for and administer Federal grants on behalf of their States, including FEMA Preparedness Grants. The SAA will work with eligible organizations to comply with the general requirements of grant programs or cooperative agreements. Contact your State's SAA to find out what current Federal funding opportunities may be available to your organization. A listing of the SAAs and points of contact can be found at <http://www.fema.gov/library/viewRecord.do?id=6363>.

FY 2013 Notice of Funding Availability (NOFA) Policy Requirements and General Section to HUD's FY2013 NOFAs for Discretionary Programs

This Notice provides prospective applicants for HUD's competitive funding with the opportunity to become familiar with the General Section to HUD's FY2013 Notices of Funding Availability (NOFAs) for Discretionary Funding (program NOFA), in advance of publication of any individual FY2013 program NOFAs. This General Section and the individual FY2013 program NOFA Sections comprise the entirety of the FY2013 NOFA instructions.

**Funding Opportunity Number:** FR-5700-N-01

**Opportunity Title:** Policy Requirements and General Section

**Competition ID:** GS-01

**CFDA No.:** 14. - All of HUD programs will start with 14. \_\_\_\_

**Open Date:** July 23, 2012

**Close Date:** December 31, 2013

**Contact:** For further information on HUD's FY2013 Policy Requirements and General Section, contact the Office of Strategic Planning and Management, Grants Management

Division, Department of Housing and Urban Development, 451 7th Street, SW, Room 3156, Washington, DC 20410-3000, telephone number (202) 708-0667. This is not a toll-free number. Persons with hearing or speech impairments may access this number via TTY by calling the Federal Relay Service at 800-877-8339.

**SUPPLEMENTARY INFORMATION:** To help applicants with electronic application registration and submission, HUD advises applicants to use the help features on the Dun and Bradstreet (D&B), Central Contractor Registration (CCR)/ SAM.gov, and Grants.gov websites. These sites all have User Guides and Frequently Asked Questions (FAQ) which are updated on an ongoing basis. HUD believes that early publication of this General Section is beneficial to prospective applicants by providing advance notice of the Department's Strategic Plan Goals, Policy Priorities, NOFA threshold requirements and other requirements that are applicable to individual FY2013 program NOFAs.

- Individuals looking for assistance, please note: HUD does not provide grants and/or loans directly to individuals – the funding is made available to state and local governments; public housing agencies (PHAs); nonprofit organizations including colleges and universities; Indian tribes and tribally designated housing entities (TDHEs); graduate students; public housing resident organizations; owners of federally assisted low-income housing; and for-profit professional and technical services companies, however we do have a website, which provides resource information which may be of assistance to you. Individuals may visit the [USA.gov website](http://USA.gov/website). This site allows you to complete a questionnaire; all of the questions must be answered in order to obtain an initial list of benefit results and to move on to the next sections of the Benefit Finder. Providing any additional information will further increase the accuracy of the individuals result. The website is user friendly; once the questionnaire is complete the site directs the individual to click the "View Benefit Results" tab to see a listing of programs that they may be eligible to receive.

**Deadlines**

U.S. Small Grants Deadlines: October 31, 2013.

**Purpose**

The Small Grants Program is a competitive, matching grants program that supports public-private partnerships carrying out projects in the United States that further the goals of the North American Wetlands Conservation Act ([Act](#)). These projects must involve long-term protection, restoration, and/or enhancement of wetlands and associated uplands habitats for the benefit of all wetlands-associated migratory birds.

This program supports the same type of projects and adheres to the same selection criteria and administrative guidelines as the U.S. Standard Grants Program. However, project activities are usually smaller in scope and involve fewer project dollars. Grant requests may not exceed \$75,000, and funding priority is given to grantees or partners new to the Act's Grants Program.

**History**

The North American Wetlands Conservation Council (Council) created the Small Grants Program in 1996 to encourage new grantees and partners to carry out smaller-scale, long-term wetlands conservation projects that may otherwise not be able to compete in the U.S. Standard Grants Program. The Small Grants Program has also become an important catalyst in developing a pool of new grantees and/or partners for the Standard Grants Program. In recent years, the Migratory Bird Conservation Commission (Commission) has approved \$3 million in funding for the Small Grants Program annually.

**The Process**

Each year, the [Commission](#) approves the total amount of funding to be distributed to projects under the Small Grants Program in the following fiscal year. Applicants submit project proposals to the U.S. Fish and Wildlife Service's Division of Bird Habitat Conservation (Division) for the program's one funding cycle per year. After a preliminary review by Division staff, [Joint Venture Coordinators](#), and [Council](#) staff, eligible proposals are presented to the Council for further review and ranking. The Council, which has been delegated final approval authority by the Commission, then selects the slate of projects to be funded and informs the Commission on its decision. The Division is responsible for administering the grants for the approved projects.

### **Current Funding**

For FY 2014 is authorized up to \$5 million contingent on quality and number of proposals received and funding available.

### **Accomplishments**

From September 1996 through June 2013, some 1,440 partners in 5,620 projects have received more than \$34.1 million in grants. They have contributed another \$136.2 million in matching funds to affect 279,000 acres of habitat.

### **Contacts**

Contact the [Joint Venture Coordinator](#) in your project area for assistance with developing a project proposal, for information about how proposals are ranked, and/or for guidance on Endangered Species Act, National Environmental Policy Act, and National Historic Preservation Act compliance requirements.

For general program information, contact the Small Grants Program Coordinator, Rodecia Mcknight ([rodecia\\_mcknight@fws.gov](mailto:rodecia_mcknight@fws.gov)), (703) 358-2266, or Cheryl Leonard ([cheryl\\_leonard@fws.gov](mailto:cheryl_leonard@fws.gov)), (703) 358-1725.

## GRANTS

The Department offers funding opportunities to conduct research, to support law enforcement activities in state and local jurisdictions, to provide training and technical assistance, and to implement programs that improve the criminal justice system.

**OJP** Office of Justice Programs offers federal financial assistance to scholars, practitioners, experts, and state and local governments and agencies. Many of the program bureaus and offices award formula grants to state agencies which sub-grant funds to units of state and local government. Discretionary grant funds are announced in the Federal Register or through program solicitations that can also be found through bureau and OJP Websites. Funding Opportunities at OJP provides links to application kits, current funding opportunities listed by source, and the Grants Management System (GMS). Of particular use to new applicants, the OJP Grants portal presents a step-by-step guide through the grant application process.

**OVW** Office of Violence Against Women administers 19 grant programs to help provide victims of domestic violence, sexual assault, dating violence, and stalking with the protection and services they need to pursue safe and healthy lives and enable communities to hold offenders accountable for their violence.

**COPS** The Community Oriented Policing Services Office (COPS) offers grants to help law enforcement agencies to hire more community policing officers, to acquire new technologies and equipment, to hire civilians for administrative tasks, and to promote innovative approaches to solving crime. The COPS Office Response Center provides information on programs, grants, and application assistance for the Office of Community Oriented Policing Services. The COPS Office Response Center also assists COPS grantees with financial questions and grant-related inquiries about COPS.

## **National Science Foundation**

### **General Funding Overview**

The National Science Foundation funds research and education in most [fields of science and engineering](#). It does this through grants, and cooperative agreements to more than 2,000 colleges, universities, K-12 school systems, businesses, informal science organizations and other research organizations throughout the United States. The Foundation accounts for about one-fourth of federal support to academic institutions for basic research.

NSF receives approximately 40,000 proposals each year for research, education and training projects, of which approximately 11,000 are funded. In addition, the Foundation receives several thousand applications for graduate and postdoctoral fellowships.

The agency operates no laboratories itself but does support National Research Centers, user facilities, certain oceanographic vessels and Antarctic research stations. The Foundation also supports cooperative research between universities and industry, US participation in international scientific and engineering efforts, and educational activities at every academic level.

## Small Business Administration

### General Overview Finding Loans & Grants

Federal, state and local governments offer a wide range of financing programs to help small businesses start and grow their operations. These programs include low-interest loans, venture capital, and scientific and economic development grants.

Use SBA.gov's [Loans and Grants Search Tool](#) to get a list of financing programs for which you may qualify, or visit the resources below to learn more about small business financing programs. To get to the main SBA.gov funding page [click here](#)

The screenshot shows the SBA.gov website interface. At the top, there is the SBA.gov logo and navigation links for 'About SBA', 'Contact SBA', 'Newsroom', 'Community', 'Partners', and 'Email Updates'. A search bar is also present. Below the navigation bar, there are tabs for 'Starting & Managing', 'Loans & Grants', 'Contracting', 'Learning Center', 'Local Assistance', and 'SBA Direct'. The main content area is titled 'Finding Loans & Grants' and includes a sidebar with a 'Starting a Business' menu. The main text explains that federal, state, and local governments offer various financing programs and highlights the 'Loans and Grants Search Tool' as a key resource. On the right side, there are two promotional boxes: 'SBA Direct' with a search button and 'Get Local Assistance Right in Your Area' with a 'Find Resources' button. At the bottom right, there is a 'Join the Community!' button.

### Small Business Learning Centers

Starting or growing a business? Owning a small business can be a fulfilling endeavor, but as you probably already know or are just finding out – it requires that you wear many hats. This of course leaves you with little time to take a deep dive into the many aspects of starting and growing a business. Instead, many business owners turn to search engines for answers when questions come up.

But what if you had access to a small business classroom that provided informed, accurate and always-available access to the advice and guidance you need?

Welcome to the **SBA Small Business Learning Center**.

### Online Training and Tools for Small Business Owners

Launched in late 2012, the SBA Small Business Learning Center is an online portal that hosts a variety of self-paced online training courses, quick videos, web chats and more to help small business owners explore and learn about the many aspects of business ownership.

Content is filtered by topic, so no matter the stage of your business, or the kind of insight you need, you can quickly get answers.

For example, if you're wondering how SBA loan programs work or just need a primer in accounting or small business taxes, check out these self-paced online financing courses and short videos. Or explore tips from the pros in these archived SBA Web Chats.

Other topics covered include starting a business as a young entrepreneur, an introduction to franchising, taking your business global with exporting, marketing 101, selling to the U.S. government, and much more.

### Get More Help Offline

And if you can't find the training or advice that you need, use the "Get Local Assistance" interactive map to find one of many small business counseling, assistance and mentoring organizations in your community.

Browse around, and let us know what you think about the SBA Small Business Learning Center!

Small Business Administration

The U.S. Small Business Administration (SBA) issues Program Announcement No. OSBDC-2014-02 (CY) to invite applications from existing SBDC recipient organization currently funded under the Small Business Development Center (SBDC) program as authorized by Section 21(a) of the Small Business Act, (15 USC Section 648); The SBDC program is the SBA's largest matching grant, funding a service delivery network to provide high quality business and economic development assistance to small businesses and nascent entrepreneurs in order to promote growth, expansion, innovation, increased productivity and management improvement. The SBDCs, in partnership with SBA's Office of Small Business Development Centers (OSBDC) and SBA District Offices, develop programs and provide business management and other services that enhance the economic development goals and objectives of SBA and their other respective state and local funding partners. The SBDC program is a broad-based system of assistance for the small business community that links the resources of Federal, state, and local governments with those of the educational community and the private sector. Although SBA is responsible for the general management and oversight of the SBDC program, a partnership exists between SBA and the recipient organization to effectuate the delivery of assistance to the small business community.

## **REMINDERS!**

### **The Small Business Innovative Research Program - SBIR Program**

The Small Business Innovation Research (SBIR) program is a highly competitive program that encourages domestic small businesses to engage in Federal Research/Research and Development (R/R&D) that has the potential for commercialization. Through a competitive awards-based program, SBIR enables small businesses to explore their technological potential and provides the incentive to profit from its commercialization. By including qualified small businesses in the nation's R&D arena, high-tech innovation is stimulated and the United States gains entrepreneurial spirit as it meets its specific research and development needs.

### **SBIR Mission and Program Goals**

The mission of the SBIR program is to support scientific excellence and technological innovation through the investment of Federal research funds in critical American priorities to build a strong national economy.

The program's goals are four-fold:

- Stimulate technological innovation
- Meet Federal research and development needs.

- Foster and encourage participation in innovation and entrepreneurship by socially and economically disadvantaged persons.
- Increase private-sector commercialization of innovations derived from Federal research and development funding.

### **SBIR-Participating Agencies**

Each year, Federal agencies with extramural research and development (R&D) budgets that exceed \$100 million are required to allocate 2.5 percent of their R&D budget to these programs. Currently, eleven Federal agencies participate in the program:

- [Department of Agriculture](#)
- Department of Commerce - [National Institute of Standards and Technology](#)
- Department of Commerce - [National Oceanic and Atmospheric Administration](#)
- [Department of Defense](#)
- [Department of Education](#)
- [Department of Energy](#)
- [Department of Health and Human Services](#)
- [Department of Homeland Security](#)
- [Department of Transportation](#)
- [Environmental Protection Agency](#)
- [National Aeronautics and Space Administration](#)
- [National Science Foundation](#)

Each agency administers its own individual program within guidelines established by Congress. These agencies designate R&D topics in their solicitations and accept proposals from small businesses. Awards are made on a competitive basis after proposal evaluation.

### **Three-Phase Program**

The SBIR Program is structured in three phases:

*Phase I.* The objective of Phase I is to establish the technical merit, feasibility, and commercial potential of the proposed R/R&D efforts and to determine the quality of performance of the small business awardee organization prior to providing further Federal support in Phase II. SBIR Phase I awards normally do not exceed \$150,000 total costs for 6 months.

*Phase II.* The objective of Phase II is to continue the R/R&D efforts initiated in Phase I. Funding is based on the results achieved in Phase I and the scientific and technical merit and commercial potential of the project proposed in Phase II. Only Phase I awardees are eligible for a Phase II award. SBIR Phase II awards normally do not exceed \$1,000,000 total costs for 2 years.

*Phase III.* The objective of Phase III, where appropriate, is for the small business to pursue commercialization objectives resulting from the Phase I/II R/R&D activities. The

SBIR program does not fund Phase III. Some Federal agencies, Phase III may involve follow-on non-SBIR funded R&D or production contracts for products, processes or services intended for use by the U.S. Government

## Eligible Applicants

Others (see text field entitled "Additional Information on Eligibility" for clarification)

## Additional Information on Eligibility:

Each applicant submitting an application must qualify as a small business concern for R/R&D purposes at the time of award, (see definitions in section 2.0). A potential grantee that is a subsidiary must show that the parent company is also a small business entity and the parent company must provide documentation supporting their small business status (the documentation should be included in Field 12, Other Attachments, of the Research and Related (R&R) Other Project Information form). If the parent company is not a small business entity, then the subsidiary is not eligible to submit an SBIR application. In addition, the primary employment of the Project Director (PD) must be with the small business concern at the time of award and during the conduct of the proposed research, unless otherwise approved in writing by NIFA. Primary employment means that more than one-half of the PD's time is spent in the employ of the small business. Primary

employment with the small business precludes the applicant as a full-time employee with another organization. This requirement applies to Phase I awards and any deviations from this requirement must be approved in writing by the USDA Authorized Departmental Officer (ADO) after consultation with the appropriate National Program Leader (NPL). While the PD must work more than one-half of his/her time for the small business during the entire grant period, there is no minimal time requirement for what percentage of the PD's time is spent working on the proposed research.

**Agency Name**

National Institute of Food and Agriculture

**Description**

See the 2014 USDA SBIR request for applications (RFA) by clicking the RFA link on the table below. Funds may be awarded up to \$100,000 for Phase I and up to \$450,000 for Phase II. Success rates for applicants have been about 14% for Phase I and 50-60% for Phase II. Projects dealing with agriculturally related manufacturing and alternative and renewable energy technologies are encouraged across all 2014 SBIR topic areas. USDA SBIR's flexible research areas ensure innovative projects consistent with USDA's vision of a healthy and productive nation in harmony with the land, air, and water. USDA SBIR has awarded over 2000 research and development projects since 1983, allowing hundreds of small businesses to explore their technological potential, and providing an incentive to profit from the commercialization of innovative ideas.

Pursuant to section 3 of the Public Works and Economic Development Act of 1965 (42 U.S.C. § 3122) (PWEDA) and EDA's regulation at 13 C.F.R. § 300.3, the following types of entities are eligible to receive funding assistance from EDA: 1. District Organizations (as defined in 13 C.F.R. § 300.3); 2. Indian Tribes or a consortium of Indian Tribes; 3. States, cities, or other political subdivisions of a State, including a special purpose unit of a State or local government engaged in economic or infrastructure development activities, or a consortium of political subdivisions; 4. Institutions of higher education or a consortium of institutions of higher education; or 5. Public or private non-profit organizations or associations acting in cooperation with officials of a political subdivision of a State.

### **Agency Name**

Economic Development Administration

### **Description**

Pursuant to PWEDA, EDA announces general policies and application procedures for grant-based investments under the Planning and Local Technical Assistance programs. Under the Planning program EDA assists eligible recipients in creating regional economic development plans designed to stimulate and guide the economic development efforts of a community or region. As part of this program, EDA supports Partnership Planning investments to facilitate the development, implementation, revision, or replacement of Comprehensive Economic Development Strategies (CEDS), which articulate and prioritize the strategic economic goals of recipients' respective regions. In general, EDA provides Partnership Planning grants to the designated planning organization (e.g., District Organization) serving EDA-designated Economic Development Districts to enable these organizations to develop and implement relevant CEDS. In addition, EDA provides Partnership Planning grants to Indian Tribes to help develop and implement CEDS and associated economic development activities. The Planning program also helps support planning organizations, including District Organizations, Indian Tribes, and other eligible Recipients, with Short Term and State Planning investments designed to guide the eventual creation and retention of higher-skill, higher-wage jobs, particularly for the unemployed and underemployed in the Nation's most economically distressed regions. The Local Technical Assistance program strengthens the capacity of local or State organizations, institutions of higher education, and other eligible recipients to undertake and promote effective economic development programs through projects such as feasibility analyses and impact studies.

Funding Instrument Type:	Cooperative Agreement Grant
Category of Funding Activity:	Other (see text field entitled "Explanation of Other Category of Funding Activity" for clarification) Regional Development
Category Explanation:	The Economic Development Administration's (EDA's) mission is to lead the Federal economic development agenda by promoting innovation and competitiveness, preparing American regions for economic growth and success in the worldwide economy. EDA fulfills this mission through strategic investments and partnerships that create the regional economic ecosystems required to foster globally competitive regions throughout the United States. EDA supports development in economically distressed areas of the United States by fostering job creation and attracting private investment. Specifically, under the Economic Development Assistance programs (EDAP) Federal Funding Opportunity (FFO) announcement, EDA will make construction, non-construction, and revolving loan fund investments under the Public Works and Economic Adjustment Assistance Programs. Grants made under these programs will leverage regional assets to support the implementation of regional economic development strategies designed to create jobs, leverage private capital, encourage economic development, and strengthen America's ability to compete in the global marketplace. Through the EDAP FFO, EDA solicits applications from rural and urban communities to develop initiatives that advance new ideas and creative approaches to address rapidly evolving economic conditions.

<b>Additional Information on Eligibility:</b>	Eligible applicants are any U.S. organization, excluding commercial organizations and federal entities, located within the United States, such as non-profit organizations, accredited institutions of higher education, and state, tribal, and local governments. An eligible organization may work individually or include proposed subrecipients, contractors or other collaborators in a project application, effectively forming a team or consortium. In a team or consortium, eligible subrecipients are the same types of organizations eligible to be applicants. In addition, commercial organizations may participate in teams or consortia as contractors, or in unfunded roles such as informal collaborators or as third parties that help to accelerate project results or help move them into routine or commercial use. Federal entities may participate in teams or consortia as contractors, informal collaborators, or in other roles allowed by law, consistent with each entity's authorities, policies, and procedures. An applicant may not submit more

than one application. The NIST Hollings Manufacturing Extension Partnership, and its National Innovation Marketplace program, may be a useful resource for connecting applicants with potential subrecipients, contractors or other collaborators.

**Description:**

NIST is soliciting applications from eligible applicants to establish and strengthen new and existing industry-led consortia that are focused on developing advanced technologies to address major technical problems that inhibit the growth of advanced manufacturing in the U.S., to identify and prioritize research projects supporting long-term industrial research needs and a range of eligible activities including but not limited to creating new or updating existing industry-led, shared-vision technology roadmaps for the development of technologies underpinning next-generation and/or transformational innovations, or undertaking other activities designed to establish and strengthen new and existing industry-led, multi-partner consortia that catalyze technology infrastructure and American excellence in advanced manufacturing.

### **Additional Information on Eligibility:**

Eligible applicants may be institutions of higher education, nonprofits, commercial organizations, international or foreign organizations or governments, individuals, state, local and Indian tribal governments. Eligibility also depends on the statutory authority that permits NOAA to fund the proposed activity. Refer to the CFDA in order to determine an applicant's eligibility. If the applicant is a university that has a NOAA Joint or Cooperative Institute (CI), the institution is encouraged to submit an application that will be associated with the CI. The application must specify the name of the CI, its most recent award number, and the NOAA-approved research theme applicable to the work to be performed in the project narrative. The application will use the facilities and administrative rate (F&A or Indirect cost rate) associated with most recent CI award. If the application is selected for funding, NOAA will notify the university that a separate competitive award will be issued with its own award number. However, the competitive award will include a Special Award Condition (SAC) that evidences the link between it and the CI award. The SAC will provide (1) that the university has submitted the proposal to be associated with the CI; (2) that any existing University/NOAA MOA will be incorporated by reference into the terms of the competitive award, and (3) that any progress report(s) for the competitive award must follow the timetable of and be

submitted by the CI directly to the funding program. Copies of these progress reports will be attached to the CI's performance report as an appendix.

**Agency Name**

Department of Commerce

**Description**

The purpose of this notice is to request applications for special projects and programs associated with NOAA's strategic plan and mission goals, as well as to provide the general public with information and guidelines on how NOAA will select proposals and administer discretionary Federal assistance under this Broad Agency Announcement (BAA). This BAA is a mechanism to encourage research, education and outreach, innovative projects, or sponsorships that are not addressed through our competitive discretionary programs. It is not a mechanism for awarding congressionally directed funds or existing funded awards. Funding for potential projects in this notice is contingent upon the availability of fiscal year 2012, Fiscal Year 2013 and fiscal year 2014 appropriations. Applicants are hereby given notice that funds have not yet been appropriated for any potential activities in this notice. Publication of this announcement does not oblige NOAA to review an application, or to award any specific project, or to obligate any available funds.

Accredited institutions of higher education and non-profit organizations located in the United States and its territories. (See <http://www07.grants.gov/aboutgrants/eligibility.jsp> for a complete list of organization types recognized by Grants.gov.) An eligible organization may work individually or include proposed subawardees, contractors or other collaborators in a project proposal, effectively forming a team or consortium. An organization may only be the lead organization on one proposal. In a team or consortium, eligible subawardees are U.S. non-profit organizations, accredited institutions of higher education, commercial organizations, and state, tribal, and local governments. Federal

agencies may participate in projects but may not receive NIST funding.

Corporation for National and Community Service

### **Description**

Established in 1971 and now one of the largest senior volunteer programs in the nation, RSVP offers a diverse range of volunteer activities that serve communities to create measurable impact, benefit volunteers through the service experience, and create community capacity. RSVP volunteers serve with commitments ranging from a few hours to 40 hours per week. Click here for RSVP Program Regulations. Through this competition CNCS seeks to increase the impact of national service in 270 specific communities across the country. CNCS intends to fund RSVP grants that support volunteers 55 years and older serving in a diverse range of activities that meet specific community needs and that respond to National Performance Measures. RSVP grant applications must:

- Serve the entire geographic service area associated with the funding

opportunities listed in Appendix A; • Support the minimum number of volunteers listed in Appendix A; • Meet the National Performance Measure requirements and other criteria established in this Notice; and • Minimize, to the extent possible, disruptions to the current volunteers associated with any incumbent project. Please see Appendix C for more information on how new and incumbent applicants must describe how they plan to minimize the disruption of volunteers if they propose graduating volunteer stations that are included in an incumbent project.

For detailed information regarding technical

goals, potential proposers are advised to refer to the websites cited above. They also are encouraged to contact DoD program managers listed at those sites before submitting proposals, in order to explore research areas that are of mutual interest to the proposers and DoD administering agencies. A proposal may be submitted to more than one administering agency; however, only one administering agency will fund the proposal, if selected, under the 2014 DURIP. A central purpose of the DURIP is to provide equipment to enhance research-related education. Therefore, proposals must address the impact of the equipment on the institution's ability to educate students, through research, in disciplines important to DoD missions.

#### **Description**

The U.S. Environmental Protection Agency (EPA), as part of its Science to Achieve Results (STAR) program, is seeking applications proposing innovative research to advance methods for characterizing real-world human exposure to chemicals associated with consumer products in indoor environments. Current understanding of human exposure to the chemical constituents of consumer products is limited due to inadequate information on formulations, emissions, and persistence in indoor environments associated with the diversity of usage scenarios. Methodological limitations currently impede collection of robust exposure information that is necessary to provide context for the results of a growing body of high throughput toxicity testing results and to characterize risk to human health for the general population and vulnerable groups. This solicitation seeks to support research that will: 1) develop and/or apply innovative technologies and methods to characterize presence and co-occurrence of suites of semivolatile chemicals (dozens to hundreds) in real-world indoor environments associated with emissions from and use of consumer products; 2) generate data to advance the scientific basis of exposure predictions by providing values for key model parameters, building confidence in model assumptions, and confirming model predictions for relevant pathways; and 3) develop and/or apply innovative technologies and methods to profile chemicals and related metabolites associated with consumer products in biological media. This solicitation provides the opportunity for the submission of applications for projects that may involve human subjects research.

<b>Eligible Applicants:</b>	Unrestricted (i.e., open to any type of entity above), subject to any clarification in text field entitled "Additional Information on Eligibility"
<b>Additional Information on Eligibility:</b>	Only U.S. academic institutions are eligible to apply. Other Federal agencies, Federally Funded Research and Development Center (FFRDC) Contractors, and nonprofit organizations described in section 501(c)(4) of the Internal Revenue Code of 1986 that engaged in lobbying activities after December 31, 1995 are not eligible to

apply. The Principal Investigator must be an untenured Assistant Professor on the tenure track or an untenured Associate Professor on the tenure track at a U.S. academic institution as of the deadline for the application. No more than ten (10) years can have passed between the year the Principal Investigator's Ph.D. was awarded and the year of the deadline for the application. For the present competition, those who received doctorates no earlier than 2003 are eligible. There can be no co-Principal Investigators. Each Principal Investigator may only submit one Office of Science Early Career Research Program application per annual competition. Additionally, a Principal Investigator may not participate in more than three Office of Science Early Career Research Program competitions. Participation in the competition is defined as submission of a full application. The act of submitting an application implies that the submitting institution has checked, confirmed, and certifies that the Principal Investigator is eligible. No additional certifying documentation is required. Applications must be submitted through a U.S. academic institution. A companion announcement (LAB 13-958) describes the Early Career Research Program opportunity for full-time DOE national laboratory employees. An employee with a joint appointment between a university and a DOE national laboratory must apply through the institution that pays his or her salary and provides his or her benefits; the eligibility criteria above must also be met. Eligibility exemptions will not be granted.

**Agency Name:** Office of Science  
**Description:** The Office of Science of the Department of Energy hereby invites grant applications for support under the Early Career Research Program in the following program areas: Advanced Scientific Computing Research (ASCR); Biological and Environmental Research (BER); Basic Energy Sciences (BES), Fusion Energy Sciences (FES); High Energy Physics (HEP), and Nuclear Physics (NP). The purpose of this program is to support the development of individual research programs of outstanding scientists early in their careers and to stimulate research careers in the areas supported by the DOE Office of Science.

**Description**

The U.S. Environmental Protection Agency (EPA), as part of its Science to Achieve Results (STAR) program, is seeking applications proposing research that will inform school (K-12 educational facilities) building design, construction and operation practices in order to foster safe and healthy school environments and maximize student achievement and teacher and staff effectiveness. Specifically, the goal is to understand the relationship between environmental factors defined broadly and the health, safety and performance of students, teachers and staff. In addition to health-related concerns, the school environment may similarly impact the performance of students, teachers and staff, including lowering student achievement outcomes, and reducing teacher effectiveness. Accordingly, research is needed to better understand the negative impacts of the school environment on students' health, safety, and achievement, and to measure the positive potential benefits of effectively managing environmental factors and applying sustainable building practices. The results of this research will help ensure that the risks of environmentally-induced illness and injury to America's students, teachers and other school staff are diminished or avoided and that students, teachers and staff are provided with optimal learning environments in their schools.

**Description:** Choice Neighborhoods Implementation Grants support the implementation of comprehensive neighborhood revitalization plans that are expected to achieve the following three core goals: 1. Housing: Replace distressed public and assisted housing with high-quality mixed-income housing that is well-managed and responsive to the needs of the surrounding neighborhood; 2. People: Improve educational outcomes and intergenerational mobility for youth with services and supports delivered directly to youth and their families; and 3. Neighborhood: Create the conditions necessary for public and private reinvestment in distressed neighborhoods to offer the kinds of amenities and assets, including safety, good schools, and commercial activity, that are important to families' choices about their community. To achieve these core goals, communities must develop and implement a comprehensive neighborhood revitalization strategy, or Transformation Plan.

**Estimated Total Program Funding:** \$12,000,000  
**Award Ceiling:** \$500,000  
**Award Floor:** \$50,000

**Eligibility:** What are the eligibility criteria that must be met to apply for an LB21 grant? To be eligible for a Laura Bush 21st Century Librarian grant, you must be either a unit of state or local government or a private nonprofit organization that has tax-exempt status under the Internal Revenue Code and be located in one of the 50 states of the United States of America, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the U.S. Virgin Islands, the Commonwealth of the Northern Mariana Islands, the Republic of the Marshall Islands, the Federated States of Micronesia, or the Republic of Palau. In addition, you must be one of the following six types of organizations: 1. A library or a parent organization, such as a school district, a municipality, a state agency, or an academic institution, that is responsible for the administration of a library. Eligible libraries include the following:; public libraries; public elementary and secondary school libraries; college and university libraries; research libraries and archives that are not an integral part of an institution of higher education and that make publicly available library services and materials that are suitable for scholarly research and not otherwise available (Research libraries must be under the supervision of at least one permanent professional staff librarian and must be either generally recognized as possessing unique scholarly research materials and services that are made available to the public, or able to demonstrate that such is the case when submitting an application to IMLS.) &#9702; private or special libraries that have been deemed eligible to participate in this program by the state in which the library is located 2. An academic or administrative unit, such as a graduate school of library and information science that is part of an institution of

higher education through which it would make application (See below for additional conditions of eligibility that might apply to such applicants.) 3. A digital library, if it makes library materials publicly available and provides library services, including selection, organization, description, reference, and preservation, under the supervision of at least one permanent professional staff librarian 4. A library agency that is an official agency of a state or other unit of government and is charged by the law governing it with the extension and development of public library services within its jurisdiction 5. A library consortium that is a local, statewide, regional, interstate, or international cooperative association of library entities that provides for the systematic and effective coordination of the resources of eligible libraries, as defined above, and information centers that work to improve the services delivered to the clientele of these libraries 6. A library association that exists on a permanent basis; serves libraries or library professionals on a national, regional, state, or local level; and engages in activities designed to advance the well-being of libraries and the library profession We recognize the potential for valuable contributions to the overall goals of the LB21 program by entities that do not meet the eligibility requirements above. Although such entities may not serve as the official applicants, they are encouraged to participate in projects as partners. Federally operated libraries and museums may not apply for LB21 grants, but they may serve as nonessential partners to applicants. Contact us before submitting a proposal involving a federal agency or federal collection. Other nonfederal entities may serve as partners and may receive IMLS grant funds as a result of the project. Consult with us about any eligibility questions before submitting an application.

**Description:**

The Laura Bush 21st Century Librarian Program (LB21) invests in the nation's information infrastructure by funding projects designed to address the education and training needs of the professionals who help build, maintain, and provide public access to the world's wide-ranging information systems and sources. In 2014, the Laura Bush 21st Century Librarian Program will

support projects to develop faculty and library leaders, recruit and educate the next generation of librarians and archivists, conduct research, build institutional capacity in graduate schools of library and information science, and assist in the professional development of librarians and archivists. This grant program is especially interested in developing information professionals who can help manage the burgeoning data generated by the nation's researchers, serve as stewards of the nation's cultural legacy, and meet the information needs of the underserved. The program also seeks to help librarians develop the information and digital literacy of their communities, as well as other critical skills their users will need to be successful in the 21st century. This program addresses the field's need to conduct research on the library and information science profession. It also seeks to advance the work of new faculty in library and information science by supporting an early career development program for untenured, tenure-track faculty. Research conducted under the early careers program should be in the faculty member's particular research area and is not restricted to research on the profession.

**Description**

The Coastal Program is a voluntary, incentive-based program that provides technical and financial assistance to coastal communities and landowners to restore and protect fish and wildlife habitat on public and private lands. The Coastal Program is not a conventional grants program, in that it does not solicit projects through a request for proposals. Instead, projects are developed strategically, in coordination with partners, and with substantial involvement from Service field biologists. If you are interested in working with the Coastal Program, please visit our website to find the nearest Coastal Program office.

**Description**

The U.S. Fish and Wildlife Service (Service) Fisheries Program's National Fish Passage Program is a voluntary, non-regulatory conservation assistance program that provides financial and technical assistance to remove or bypass artificial barriers that impede the movement of fish and other aquatic species and contribute to their decline. The National Fish Passage Program received \$11.0 million of operational funds to implement the program in Fiscal Years 2011. The Service will implement fish passage improvement-based, cost-shared projects to protect, restore, or enhance habitats that support fish and other aquatic species and their populations. All or a portion of project funds may be transferred to partner organizations through cooperative agreements if the Service lacks the capability to implement a project. To determine eligibility of a specific project contact the REGIONAL COORDINATOR in your area. A list of Coordinators and their responsible geographical areas is attached to this announcement under the APPLICATION INSTRUCTIONS.

**Description**

The National Historical Publications and Records Commission seeks projects that are exploring innovative methods to improve the preservation, public discovery, or use of historical records. Projects may also focus on techniques and tools that will improve the professional performance and effectiveness of those who work with such records, such as archivists, documentary editors, and records managers. Projects must anticipate results that will affect more than a single institution or a single state. Projects may focus on methods of working with records in any format, including born-digital records. Projects designed to publish historical records must focus on innovative methods of presenting archival records as primary sources. The Commission does not fund projects focused on artifacts or books. For a comprehensive list of the Commission's limitations on funding, please see [What we do and do not fund](http://www.archives.gov/nhprc/apply/eligibility.html) (<http://www.archives.gov/nhprc/apply/eligibility.html>). Applications that consist entirely of ineligible activities will not be considered. A grant normally is for one to three years. The Commission expects to make up to six grants of between \$50,000 and \$150,000. The total amount allocated for this program is up to \$500,000. The Commission requires that grant recipients acknowledge NHPRC grant assistance in all publications and other products that result from its support.

**Agency Name**

National Archives and Records Administration

**Description**

The National Historical Publications and Records Commission seeks proposals that promote the preservation and use of the nation's most valuable archival resources. Projects should expand our understanding of the American past by facilitating and enhancing access to primary source materials. The Commission will support such activities as establishing archives programs, processing archival collections at the basic or detailed levels, surveying and accessioning archival records, and converting existing archival collection finding aids to new online formats. Applicants may submit proposals for one or any combination of the following four project categories: Categories 1. Basic Processing Proposals may be submitted for establishing archives and undertaking basic processing activities that promote the preservation and use of America's documentary heritage. Proposals must demonstrate how the applicant employs the best and most cost-effective archival methods. For projects to establish new archives programs, a proposal may include the cost of a consultant to assess the need for an archives program. The assessment should identify the resources necessary for sustaining such a program and include a collection development plan, a plan for basic processing of unprocessed collections and new accessions in a timely manner, and a phased preservation plan. If the organization already has a detailed assessment, it may submit a proposal for costs associated with starting its archives program, as outlined in the assessment. Applicants may also submit proposals for records management projects with archival components. Applicants for start-up projects must provide convincing evidence of ongoing program support and must also demonstrate their commitment to creating equitable and timely access to their holdings. For projects that process and reveal archival collections which researchers cannot easily discover through online search engines, proposals should demonstrate how repositories will process and catalog records at either the collection or the series level. Applicants will need to create collection- or series-level MARC catalog records in a national bibliographic utility. If finding aids are created, they should generally meet current Encoded Archival Description standards, and be made available to appropriate regional and national archival databases. Basic processing cannot include processing or description at the folder or item levels. Institutions must develop or implement processing techniques to eliminate unprocessed backlogs of holdings at a level consistent with appropriate standards and at a reasonable rate. In addition, applicants must develop and establish adequate accessioning and processing techniques that will prevent future backlogs. Basic processing proposals should also include reappraisal of collections and include a process for deaccessioning entire collections where appropriate. Applicants must also include plans to promote the use of their collections after completing this processing. Applications may request funds for limited preservation activities, such as preservation surveys of collections, the evaluation of environmental controls, and risk assessments. Although the NHPRC does

not fund construction projects, applicants may include planning for necessary improvements to physical facilities. Impermissible activities include comprehensive reboxing and refolding, the removal of staples and paper clips, and item-level repairs and conservation. Reformatting, digitizing, and microfilming are also not permissible. Preservation copying of faded or damaged documents should be extremely limited. 2. Detailed Processing For collections with proven high research demand or substantial preservation concerns, applicants may propose to conduct detailed processing and preservation reformatting of collections of national significance. For projects that focus entirely on detailed processing, the Commission will give preference to repositories that have virtually all of their collections processed sufficiently so that researchers can find them through online searches. In general, proposals should describe how the repository will process and create detailed descriptions at the series or file level. Projects should create or revise online descriptions and submit them to national library catalogs, national archival databases, and appropriate regional and institutional databases. Applicants must also create or revise detailed finding aids using Encoded Archival Description (EAD) unless other formats are more appropriate. Applicants must explain whether any item-level processing or preservation treatment will be necessary, including refolding, cleaning, flattening, copying, encapsulating, de-acidifying, and mending documents. If parts of collections deserve item-level processing, proposals must justify this detailed work and provide estimates of the percentage of collections to be processed to the item level. Applicants may apply for grants in support of preservation reformatting. For collections containing unstable audio or video materials, applicants may propose preservation reformatting or migration to appropriate analog or digital formats. When appropriate, applicants should consider hybrid microfilm/digitization (using dual head cameras, or microfilm-to-digital or digital-to-microfilm techniques). For collections that include born digital files, applicants should include appropriate long-term digital preservation plans. Applicants may propose limited digitization of series or items that have the most potential to benefit a broad public. Applications should detail the standards to be used in this process, itemize anticipated expenses, and estimate the percentage of the collections to be digitized. Applicants intending to submit projects that only digitize materials should see the Digitizing Historical Records announcement:

(<http://www.archives.gov/nhprc/announcement/digitizing.html>). Applicants should also outline their publicity and outreach plans for promoting use of collections. 3.

Documentary Heritage Documentary heritage projects create more comprehensive documentation of United States history and culture by supporting projects that identify, survey, collect, and make available nationally significant records relating to groups and topics traditionally underrepresented in the historical record. Eligible activities include arrangement and description projects, documentation surveys, archival needs assessments, or some combination of the three. The NHPRC does not support projects to create new documentation, except for oral history projects conducted by American Indian tribes or indigenous peoples of the Pacific Islands that rely on oral traditions to document their history and culture. Newspapers also are not considered historical records for the purposes of this announcement. All projects that include collecting activities must show that the institution has developed, or will develop as a part of the project, initial processing techniques to gain basic physical and intellectual control over new accessions. If the repository has a large unprocessed backlog of holdings, collections development activities

may only occur alongside basic processing activities. Projects that include elements of arrangement and description must not include item-level processing. 4. Retrospective Conversion of Descriptive Information Proposals may be submitted for converting legacy finding aids and other sources of archival descriptive information into formats that provide improved online access to primary source collections. Activities may include converting card catalogs of archival materials and paper finding aids so that they may be made available electronically, or creating a comprehensive online database or finding aids from information only available in a variety of non-compatible formats. Applicants must use Encoded Archival Description (EAD) for finding aids unless other formats are more appropriate. For a comprehensive list of Commission limitations on funding, please see "What we do and do not fund" (<http://www.archives.gov/nhprc/apply/eligibility.html>). Applications that consist entirely of ineligible activities will not be considered.

**Information on**

**Eligibility:**

Individual translators who meet the publication requirements that are listed below are eligible to apply. Applicants must be citizens or permanent residents of the United States. See "How to Prepare and Submit an Application" for the documentation that is required to demonstrate eligibility. Ineligible applications will be rejected without panel review. An individual may submit only one application for FY 2015 funding. You may not apply for both a Translation Project under this deadline (December 9, 2013) and a Literature Fellowship (in prose or poetry) under the 2014 deadline (when fellowships in poetry are offered). See Literature Fellowships for more information. You are not eligible to apply if you have received three or more Fellowships (in poetry, prose, or for translation) from the National Endowment for the Arts. In addition, you may not apply in Translation if you have received any Arts Endowment Literature Fellowships (in prose or poetry) or Translation Fellowship on or after October 1, 2010 (FY 2011). Finally, you may not apply in Translation with the same project for more than three consecutive years. Former grantees must have submitted acceptable Final Report packages by the due date(s) for all Arts Endowment award(s) previously received.

**Description:**

The Arts Endowment's support of a project may begin any time between November 1, 2014, and November 1, 2015, and extend for up to two years. Grant Program Description Through fellowships to published translators, the Arts Endowment supports projects for the translation of specific works of prose, poetry, or drama from other languages into English. We encourage translations of writers and of work that are not well represented in English translation. All proposed projects must be for creative translations of literary material into English. The work to be translated should be of interest for its literary

excellence and value. Priority will be given to projects that involve work that has not previously been translated into English. Competition for fellowships is rigorous. Potential applicants should consider carefully whether their work will be competitive at the national level. We Do Not Fund • Individuals who previously have received three or more Literature Fellowships (in prose or poetry) or Translation Fellowships from the National Endowment for the Arts. • Individuals who have received any Literature Fellowship (in prose or poetry) or Translation Fellowship from the National Endowment for the Arts within the past five years. • Applicants applying with the same project for more than three consecutive years. • Scholarly writing. (Writers who are engaged in scholarly work may wish to contact the National Endowment for the Humanities.) • Work toward academic degrees.

**Description**

The Digital Humanities Start-Up Grants program awards relatively small grants to support the planning stages of innovative projects that promise to benefit the humanities. Proposals should be for the planning or initial stages of digital initiatives in any area of the humanities. Digital Humanities Start-Up Grants may involve • research that brings new approaches or documents best practices in the study of the digital humanities; • planning and developing prototypes of new digital tools for preserving, analyzing, and making accessible digital resources, including libraries' and museums' digital assets; • scholarship that focuses on the history, criticism, and philosophy of digital culture and its impact on society; • scholarship or studies that examine the philosophical or practical implications and impact of the use of emerging technologies in specific fields or disciplines of the humanities, or in interdisciplinary collaborations involving several fields or disciplines; • innovative uses of technology for public programming and education utilizing both traditional and new media; and • new digital modes of publication that facilitate the dissemination of humanities scholarship in advanced academic as well as informal or formal educational settings at all academic levels. Innovation is a hallmark of this grant category, which incorporates the "high risk/high reward" paradigm often used by funding agencies in the sciences. NEH is requesting proposals for projects that take some risks in the pursuit of innovation and excellence. Digital Humanities Start-Up Grants should result in plans, prototypes, or proofs of concept for long-term digital humanities projects prior to implementation.

**Description**

The NEH Enduring Questions grant program supports faculty members in the teaching and development of a new course that will foster intellectual community through the study of an enduring question. This question-driven course will encourage undergraduates and teachers to grapple with a fundamental concern of human life addressed by the humanities, and to join together in a deep and sustained program of reading in order to encounter influential thinkers over the centuries and into the present day. What is an enduring question? The following list is neither prescriptive nor exhaustive but serves to illustrate. • What is good government? • Can war be just? • What is friendship? • What is evil? • Are there universals in human nature? • What are the origins of the universe? Enduring questions are questions to which no discipline, field, or profession can lay an exclusive claim. In many cases they predate the formation of the academic disciplines themselves. Enduring questions can be tackled by reflective individuals regardless of their chosen vocations, areas of expertise, or personal backgrounds. They are questions that have more than one plausible or compelling answer. They have long held interest for young people, and they allow for a special, intense dialogue across generations. The Enduring Questions grant program will help promote such dialogue in today's undergraduate environment. The course is to be developed by one or more (up to four) faculty members at a single institution, but not team taught. Enduring Questions courses must be taught from a common syllabus and must be offered during the grant period at least twice by each faculty member involved in developing the course. The grant supports the work of faculty members in designing, preparing, and assessing the new course. It may also be used for ancillary activities that enhance faculty-student intellectual community, such as visits to museums and artistic or cultural events. An Enduring Questions course may be taught by faculty from any department or discipline in the humanities or by faculty outside the humanities (for example, astronomy, biology, economics, law, mathematics, medicine, or psychology), so long as humanities sources are central to the course.
